

أسطورة الكلمات

Master Code & Feature Specification — Lore, Branding, and Update Prompt

I had a little chat with Gemini, to build a logo, but then I had to talk about the whole project, to get a name, so that the logo has a background and has a reason or to be precise is connected with the name and lore. So, we basically ended up with a 2 hour session of editing, and these are the results a full prompt of new adjustments. This is way better, then adjusting with you the small details, because the usage gets depleted easily and then the changes are we removed eagle for potential أسطورة الكلمات minors. But with 2 AIs help, it is way easier. Now the name is gray areas of haram, instead a robo, TBH, I would have thought gemini would come up with that idea, but I did, I don't know how, but suddenly my brain decided to have a very innovative idea, adding a robot also make sense in terms of the lore, since this is probably a story of a developed civilization. Anyways, a few things, the text is this
:(Introduction - المقدمة) Modal 1

"أهلاً يا بطل! أنا 'روبو-سبيكتر'، حارس مدينة الكلمات الأبدي."

"ضربت 'عاصفة النسيان' مدينتنا، وبعثرت 'بلورات الكلمات' الإنجليزية وحبست سحرها داخل الأبراج المظلمة!"

"مهمتك: خض التحديات، استرد البلورات المفقودة، واستعد طاقة اللغة خطوة بخطوة!"

Four popups just like what we did but "ابن 'برج المعرفة' الخاص بك، افتح القدرات الخارقة، واجعل اسمك يُخلد في قائمة الأساطير!" modified the lore, a whole fifth page or tab in between play page and the store page, where the player can see the tower with the description mentioned in the prompt down bellow, you know greyed out, and each floor unlocks when you defeat a boss, also adding 2 bosses for the free version with a final boss, (but not really the final, if you can make that clearcut like saying small storm oblivion) and in the paid version same 5 bosses, but 4 more and ,the 5th is the storm oblivion that scattered the crystals. Also I will talk to you in another chat to add the logo because this chat exceeded the limit, you know what, even this message I will be sending it in the other
===== .chat

MASTER CODE & FEATURE SPECIFICATION (أسطورة الكلمات)
